Dr. Larry H. Lindsay invites you to attend this very intense 3-day LIVE Dental Implant Surgical Course in Austin, Tx. The course objective is to prepare participants to treat the partially edentulous patient and also to utilize grafting to facilitate future implant placement.

One day of workshops & lectures is followed by two days of Live surgeries performed by YOU. The number of implants placed during the course is dependent upon patients' clinical needs and relative to exceptional patient treatment. The cases are selected to give the attendees experience in a variety of implant scenarios such as extraction with immediate implant placement, posterior and anterior implant placement, crestal sinus bump/lift, ridge augmentation, grafting etc. Attendees will also get hands-on experience treating patients utilizing PRF (Platelet Rich Fibrin)/ CGF(Concentrated Growth Factors) as well as all aspects of bone grafting.

A step-by-step learning methodology ensures that course participants return with the confidence to duplicate the proper protocols in their own practice.

An active unrestricted Texas Dental License is required for attendees to be able to actively participate in surgical procedures. Attendees will treat patients that have been thoroughly selected in our prescreening process.

Why spend 3 times the cost of this course traveling to foreign countries, when you can enjoy the same unique learning experience in your own back yard?

Welcome to join us in Austin Tx for a unique learning experience!

COURSE OBJECTIVES
- Patient evaluation & treatment planning with the prosthetic outcome in focus
- All implant placements & surgeries by attendees treating patients
- PRF (Platelet- Rich Fibrin) / CGF (Concentrated Growth Factors) - utilization & procedure

TESTIMONIALS

❝ I had a great experience at the course. The course was well planned and executed. Joel, Dr. Lindsay and his staff went above and beyond my expectations to make this a wonderful experience. I have attended many hands on courses for different topics in dentistry but this was a true hands on experience. The course was rigorous and exhausting but I could not have asked for anything different. I was pleased with myself after completing 8 implant placements in 2 days, including grafting with immediate implant and sinus lift procedure. Had somebody mentioned to me earlier how good this course was, I would have completed it earlier.❞  
M. Thirtha DDS, Irving, TX

❝ The course was fantastic. If you place implants or are interested in placing implants this course is a must. You learn by doing the procedures not learning by watching. It’s an intense course but is a valuable experience for any practitioner’s practice.❞ T. Warren DDS - FT Worth, Texas
