Mentors

Dear Friends and Colleagues,

Our goal at RDI is to provide a comprehensive educational experience that focuses on the best end-result for the patient.

Incorporating the most-up-to-date research-based knowledge and clinical training, we will equip dentists with the skills and tools they need for successful implant placement and seating the final restoration.

With small student-to-mentor ratios, we provide a personable experience that gives dentists the opportunity to feel comfortable asking questions. At RDI - if you succeed, we all succeed.

Dr. Wesley Mullins, DDS, *attained his dental degree from the West Virginia University School of Dentistry. Dr. Mullins completed his general practice residency at the University of Tennessee Medical Center and serves as a faculty member. He is a proud member of the American Dental Association, the Academy of General Dentistry, the Tennessee Dental Association, and the Second District Dental Society. Dr. Mullins practices in Knoxville, TN.*

Dr. Jan Bublik, DDS, *received his Doctor of Dental Surgery and Doctor of Medicine degrees from Palacky University in Olomouc, Czech Republic. He then came to the University of Rochester where he achieved advanced training in General Dentistry. Dr. Bublik is recognized as a Diplomat of International Congress of Oral Implantologists. He is also a member of the American Academy of Facial Esthetics and the American Academy of Craniofacial Pain. He has served as faculty at Eastman Dental Center, and currently practices in Weston, WI.*

Dr. Jon Rogers, DDS, *received his undergraduate degree from Appalachian State University and has been practicing dentistry full-time since graduating from the University of Connecticut School of Dental Medicine in 2006. Dr. Rogers is a member of the American and Tennessee Dental Associations, the local First District Dental Society, the East Tennessee Dental Practice Academy, the Christian Medical/Dental Association, the Academy of Osseointegration and the American Academy of Implant Dentistry. Dr. Rogers practices in Greenville, TN.*

Dr. Todd Hehli, DDS, *graduated from the University of Minnesota School of Dentistry in 1989. He began working as a clinical dentist and clinical director for a large group practice. He is recognized as one of the top dentists nationally for his talents in adult restorative care, cosmetic and implant dentistry, and sedation dentistry. In 2000, he formed Summit Dental Management and Consulting and currently works with 430 team members and over 85 partner and associate Dentist's in 30 private practices in the Midwest. Dr. Hehli enjoys helping Dentists create customized systems to help them achieve the results they strive for in their practices. As a member of the American Dental Association, Wisconsin Dental Association, and the Spear Institute, he keeps his pulse on the current needs of the dental profession.*

Bob & Brad Slominski, *with more than twenty-seven years of experience, Bob and Brad Slominski have a wealth of knowledge in the dental lab industry. Specializing in CT guided surgery, implants and dental restorations, they have spent countless hours chairside helping ensure the best outcome for doctors and their patients.*

Testimonials

Dr. Steve Eiler

"Unbelievable course! It is impressive to see the comradery throughout the series, the sharing of information and there are no egos present.

I have learned how to work through a treatment plan and how to be a more comprehensive dentist.

The case exposure was awesome, an amazing surgical experience!"

Dr. Kacie Sharpe

"I am new to placing implants so getting the experience and knowledge to place multiple implants on multiple patients was priceless.

One of my cases was a difficult extraction, conical roots, and we weren't sure we would be able to even place the implant. It was a successful placement and I was also able to place a custom tissue former, which I have not been exposed to before.

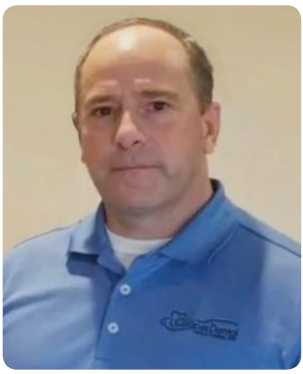
Best CE I have ever been to, and I would recommend to others."

Dr. Bruce Thomas

"As an oral surgeon, I was impressed by the quality of education, the preparation and the systematic approach. I am confident the doctors that complete this course, will be able to go back to their practices and safely and successfully place implants.

The small student-to-mentor ratio, allows the attendees to receive the proper amount of time and guidance to learn the critical thinking process that goes along with placing implants.

I recommend and encourage general dentists to attend."



Dr. Jerry Cooper

"Not only was I able to have my own hands-on case, I was able to work with other doctors on multiple cases.

This experience exceeded my expectations and I will be able to go back and implement it into my practice right away. I know now I have all the tools in my kit to begin placing implants.

I would highly recommend to others."

Dr. Lucy Gore

"All the instructors were very helpful, thorough, and approachable. Great to have the first day of surgeries working with one mentor and the second day with a different mentor. A good experience to see different approaches.

The course overall was great, thank you!"

3-Part Seminar Series

SERIES 1

Restorative Driven Implantology and Surgical Principles

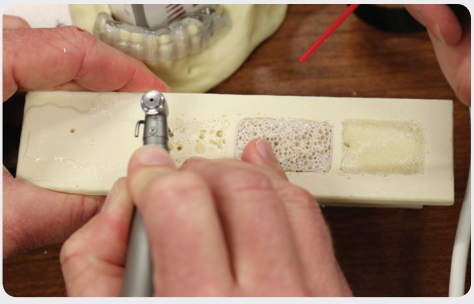
2 days of lecture & hands-on activities to include the following topics:

Online Module

(to be completed prior to attending the in-person lecture and hands-on course)

- *History of dental implants*
- *What makes a good implant?*
- *Pharmacology*
- *How to take a good CT scan*
- *What is needed to make a surgical guide?*

Hands-On Activities



- *Drilling practice into D1 thru D4 bone types*
- *Implant placement into mandibular bone models (free handed & CT surgical guides)*

- *Suturing techniques on chicken breast and simulated tissue*

Lecture

- *Dental concerns for case selection*
- *Principles of guided vs. conventional surgery*
- *Parts & pieces of implant dentistry*
- *Bone healing - what is normal?*
- *Understanding surgical principles*
- *Concept of healed ridge implant placement*
- *Infection control & asepsis*
- *Extractions - not your everyday*
- *Socket preservation*
- *Incision and flap design*
- *Suturing techniques*
- *Material selection (sutures, membrane types, grafts)*
- *Graft containment*
- *Bone healing dynamics*
- *Maintaining vs. obtaining soft and hard tissue*
- *How to use ISQ technology with healed ridge implant placement*

SERIES 2

Restorative Driven Implant Placement and Prosthetics

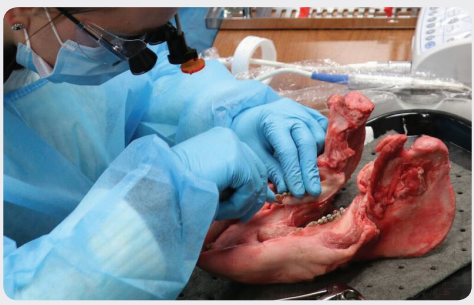
2 days of lecture & hands-on activities to include the following topics:

Online Module

(to be completed prior to attending the in-person lecture and hands-on course)

- *Case for immediate implant placement*
- *Case selection and immediate planning*
- *Review extraction technique*
- *Placement protocol and graft containment*

Hands-On Activities



- *Hands-on training using pig jaws (extractions, grafting, suturing and socket preservation)*

- *Hands-on model demonstration (open and closed tray impression techniques, temporary abutment and crown fabrication, abutment selection and placement process, etc.)*

Lecture

- *Recap extraction technique*
- *Implant placement for denture patients (how many do you place and when)*
- *Introduction to complex implant treatment planning/full arch*
- *Evaluating socket type*
- *Principles of graft containment*
- *Implant selection based on socket anatomy*
- *CT guided surgery vs. conventional for immediate implant placement*
- *Understand when to immediate load implants and when you should not*
- *How to use ISQ technology for immediates*
- *Implant restorations (screw retained vs. cement retained)*
- *Open and closed impression techniques*
- *Abutment selection and design*
- *Immediate previsualization*
- *Chair-side custom tissue formers vs. lab fabricated custom formers*
- *Crown and bridge material selection*
- *Customized impression coping*
- *Principles of overdenture treatment planning*
- *Implant restorations for the edentulous patient and vertical requirements*

3-Part Seminar Series

SERIES 3

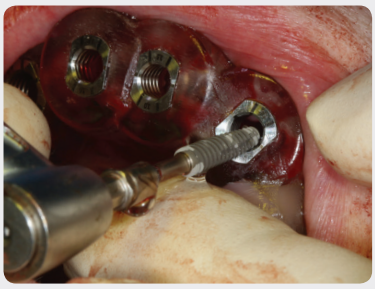
Restorative Driven Implant Surgery and Implementation

AFTER THE COMPLETION OF SERIES 1 AND 2…

2½ days of hands-on surgeries and lecture to include the following:

Hands-on Live Patient Surgeries

- *Pre-operative workup using CBCT for each patient*
- *Live, clinical implant surgery on multiple patients over 2 days*
- *Mentored, over the shoulder, implant training with Dr. Mullins, Dr. Bublik, Dr. Rogers and Dr. Hehli*
- *On average, 10 implants will be placed per doctor*
- *Implants will be placed in at least one edentulous arch for an implant retained denture*
- *Small, student-to-mentor ratio*
- *Preselected implant patients to ensure success*
- *State-of-the-art facility and instrumentation with CBCT on site*
- *Post-operative recap of implant placement surgeries after each day*



• Hands-on implant placement

Half-day Lecture

- *How to implement Restorative Driven Implant education in your practice*
- *What you need to do different as a dentist in your practice on Monday morning*
- *What your team needs to hear and believe*
- *A recipe for case acceptance… the secret sauce*
- *What codes do I use for implant procedures?*
- *The insurance excuse and patient financing*
- *Marketing and internal referrals*
- *How to enjoy the journey*

SERIES 3 includes Staff Training Component

Each doctor is encouraged to bring 2 members of their practice to attend the staff component.

- *2½ days (Friday, Saturday and Sunday)*

Topics will include:

- *Hands-on with implant parts and pieces*
- *Operatory set-up and aseptic technique*
- *Four-handed implant dentistry*
- *Sterilization of instruments and surgical trays*
- *Organizing inventory*
- *Understanding implant parts and pieces*
- *Informed consent*
- *Post-op instructions*
- *Implementation*

Megan Ridenour,
Staff Training Presenter

2019 DATES & LOCATIONS

FALL 2019 (3-part series)

- *Series 1 - September 13-14, 2019 - Des Moines, IA*
- *Series 2 - September 27-28, 2019 - Des Moines, IA*
- *Series 3 - October 25-27, 2019 - near Minocqua, WI*

2020 DATES & LOCATIONS

SPRING 2020 (3-part series)

- *Series 1 - January 31-February 1, 2020 - Minneapolis, MN*
- *Series 2 - March 6-7, 2020 - Minneapolis, MN*
- *Series 3 - April 3-5, 2020 - near Minocqua, WI*

FALL 2020 (3-part series)

- *Series 1 - August 28-29, 2020 - Chicago, IL*
- *Series 2 - September 25-26, 2020 - Chicago, IL*
- *Series 3 - October 23-25, 2020 - near Minocqua, WI*

(For additional information about these dates and locations, please visit our website at www.restorativedrivenimplants.com or call 1-833-342-5734)

COURSE FEES

3-PART FULL SERIES

- *Registration Fee is $12,995.*
- *Payment plans are available upon request, CALL **1.833.342.5734.***

(Attendees can audit Series 1 and 2 only, for $2,400 each. In order to participate in live patient surgeries, Series 3, attendees must complete Series 1 and 2.)

Registration

Seating is limited and pre-registration is required.

TO REGISTER CALL 1-833-342-5734

- *We accept major credit cards.*
- *We offer payment plans that can be customized to your needs.*
